

# PRODUCT REQUIREMENTS DOCUMENT (PRD)

**Product: Jiniks Construction Website**

**Version: 1.0**

---

## 1. Product Overview

Jiniks Construction requires a **modern, high-impact website** that presents the company as a **premium, reliable, and capable construction brand**.

The product will:

- Showcase projects using **high-quality images and videos**
  - Enable **client inquiries and bookings**
  - Attract **talent via a careers page**
  - Deliver a **clean, fast, and visually compelling experience**
- 

## 2. Goals & Success Metrics

**Goals:**

- Establish strong digital credibility
- Convert visitors into **leads (bookings/contact)**
- Present portfolio in a **visually impressive way**
- Maintain **simplicity with premium feel**

**Success Metrics:**

- Users spend > 2 minutes on site
  - Portfolio interaction rate (clicks on projects)
  - Number of booking/contact submissions
  - Mobile usability score > 90%
- 

## 3. Target Users

### 1. Clients

- Individuals building homes
- Companies needing construction services

### 2. Job Seekers

- Engineers, architects, labor professionals

### 3. Admin (Internal)

- Manages content (projects, jobs, media)
- 

### 4. 🧠 Product Principles

- **Simplicity over complexity**
  - **Visual storytelling over text**
  - **Whitespace equals premium**
  - **Fast, smooth, responsive**
- 

### 5. 📖 Product Scope

#### Included:

- Public website (all pages)
- Portfolio with media (images/videos)
- Booking & contact forms
- Careers & job applications
- Admin content management (basic)

#### Not Included (Phase 1):

- Payments
  - User accounts for customers
  - Complex CMS
- 

### 6. 🧩 Core Features

---

#### 6.1 Hero Experience

##### Description:

A fullscreen visual slider on the homepage.

##### Requirements:

- Displays 3–5 slides
- Auto-rotates every **30–60 seconds**
- Smooth transitions (fade/slide)
- Each slide contains:

- Background image/video
- Headline
- Subtext
- CTA button

**Expected Outcome:**

Immediate visual impact within 5 seconds.

---

## 6.2 Portfolio (Core Feature)

**Description:**

A visual gallery of completed projects.

**Requirements:**

- Grid layout of projects
- Each project includes:
  - Cover image
  - Title
  - Location
- Click opens **project details page**

**Project Details Page:**

- Image/video gallery (carousel)
- Description
- Key metadata:
  - Location
  - Completion date
  - Scope

**Expected Outcome:**

Users perceive credibility and quality instantly.

---

## 6.3 Booking / Consultation

**Description:**

Allows users to request services.

**Requirements:**

- Simple form:

- Name
  - Email
  - Phone
  - Project type
  - Budget range
  - Message
- Submission:
  - Stored in system
  - Optional email notification

**Expected Outcome:**

Generate qualified leads with minimal friction.

---

## 6.4 Services

**Description:**

Displays company offerings.

**Requirements:**

- 3–6 services
- Each includes:
  - Title
  - Short description
  - Icon or image

**Expected Outcome:**

Users quickly understand what the company does.

---

## 6.5 Careers

**Description:**

Lists job openings and allows applications.

**Requirements:**

- Job listing page
- Each job includes:
  - Title
  - Location

- Type
- Application:
  - Name
  - Email
  - CV upload

**Expected Outcome:**

Attract qualified candidates.

---

## 6.6 Contact

**Description:**

Direct communication channel.

**Requirements:**

- Contact form
  - Company contact details
  - Map integration
- 

## 7. User Experience (UX)

**Navigation:**

- Sticky top navigation
  - Clear menu:
    - Home
    - About
    - Services
    - Portfolio
    - Careers
    - Contact
- 

**Scrolling Behavior:**

- Smooth scrolling
  - Sections fade/slide into view
- 

**Interactions:**

- Hover effects on cards
  - Buttons have subtle animation
  - Images slightly zoom on hover
- 

## 8. 🎨 UI Requirements

### Design Style:

- Minimal
- Spacious
- Image-focused

### Colors:

- Primary: Orange
- Background: White
- Text: Dark gray

### Typography:

- Bold headings
  - Clean readable body text
- 

## 9. 📱 Responsiveness

- Fully responsive across:
  - Mobile
  - Tablet
  - Desktop

**Priority:** Mobile-first experience

---

## 10. ⚙️ Functional Requirements

- Fast load time (<3 seconds)
  - Image optimization
  - Video support
  - Form validation (client + server)
  - Error handling for submissions
-

## 11. Admin Capabilities

Admin should be able to:

- Add/edit/delete projects
  - Upload images/videos
  - Add/edit jobs
  - View booking requests
  - View contact messages
- 

## 12. Content Requirements

**Media:**

- High-quality project images
- Optional background videos

**Text:**

- Short, impactful copy
  - Avoid long paragraphs
- 

## 13. Release Criteria

The product is complete when:

- All pages are functional
  - Portfolio displays correctly with media
  - Forms submit successfully
  - UI is clean and consistent
  - Works across all screen sizes
- 

## 14. Future Considerations

- Admin dashboard (full CMS)
  - Blog/news section
  - Project filtering/search
  - Online consultation scheduling
- 

## 15. One-Line Product Definition

A clean, modern, media-rich construction website that showcases projects, builds trust, and converts visitors into clients.
